

# Your CAR-T Episode Impact Estimate

{{IMPACT\_RANGE}}

Category	Value/Range
CAR-T Drug Cost	\$373,000 (fixed)
Inpatient Margins	-\$9K to +\$24K per patient
Outpatient Episode Cost	\$6,750 Current Health base
Outpatient Services	\$15,000
Implementation Fee	\$75,000 (amortized)
Payer Mix	{{PAYER_MIX}}
Annual case volume	{{PATIENT_VOLUME}}
Volume & Shift %	{{OUTPATIENT_SHIFT}}

## What's Included in the Current Health Care Episode

- **Real-Time Clinical Insights:** FDA-cleared devices and automated alerting, streamed to providers and our 24/7 nursing center
- **Clinical Pathways:** Standardized protocols tailored to CAR-T, BiTE, and high-toxicity agents
- **Home Diagnostics:** In-home phlebotomy, imaging coordination, and integrated toxicity tracking
- **Fully Managed Logistics:** Kitting, shipping, and device return handled from end-to-end
- **EHR Integration:** Built-in Epic flows for faster adoption and smoother charting

Want to dive deeper into  
how this model can work  
for you?

Let's chat.

A leading  
model for high-  
cost therapies:

**Home-based care unlocks margin improvement and access.** Offers real-time safety, rapid escalation, and scale in delivering specialty therapies in non-hospital settings.

**Proven post-infusion model.** Infrastructure elements like therapy-specific pathways, neurotoxicity monitoring, and 24/7 oversight are already validated in high-acuity cancer care.

**Rooted in evidence-based research.** Insights from clinical fieldwork and service evaluations inform every protocol—from protocolized care to outcomes.
